

Product Description

The RBS671 is a high performance Gallium Arsenide single pole double through broad band RF switch. It is suitable for use in broadband communications and instrumentation applications. The isolated port of the switch is terminated with a 50 ohm load. The switch is controlled by the application of complimentary 0V/-5V or 0/-8V signals to the control lines in accordance with the truth table below.

Features

- Broadband performance
- High Isolation; 45 dB typ at 1 GHz
- Ultra low DC power consumption

Notes

1. Insertion loss and Isolation measured between RF Input and any output.
2. Return Loss measured in low loss switch state.
3. Input power at which insertion loss compresses by 1dB.
